

Multisyllable Words with Vowel Sound #2 - /e/ - (ea and ai only)

Copyright © 2007 OnTrack Reading

Two-syllable words are sorted into two large groups depending upon which syllable the targeted vowel sound appears, 1st or 2nd. Within those two groups, three divisions occur.

- 1) **Basic Consonants** consists of words with only Basic Code consonant spellings
- 2) **Adv Consonants** consists of words with any Advanced Code consonant spelling.
- 3) **Advanced Vowels** consists of words containing vowel sounds not yet covered in the OnTrack Reading curriculum's vowel sequencing.

Three-syllable words are sorted into three groups depending on which syllable the targeted vowel sound appears, 1st, 2nd or 3rd but not into levels of code used in the word.

Words with four, five or six syllables are sorted just by the number of syllables.

Note: Words are *not* divided into formal syllables. The divisions are according to the method used in the OnTrack Reading curriculum's *Main Rule and Three Exceptions*.
